

AI Usage Card for NLP Project

2026

CORRESPONDENCE(S) Mohd Uwaish	CONTACT(S) mohd.uwaish@stud.uni-goettingen.de PROJECT NAME DNLP SS26 Multitask BERT DATE(S) USED 2026-07-01	AFFILIATION(S) University of Göttingen KEY APPLICATION(S) Semantic Textual Similarity VERSION(S) undefined
MODEL(S) Gemini 3.1 Pro, Claude OPUS 5 (via claude.ai and claude code)		
IDEATION Gemini 3.1 Pro, Claude OPUS 5	GENERATING IDEAS, OUTLINES, AND WORKFLOWS Gemini was used to check the feasibility of ideas for a task and counter validated by Claude OPUS. FINDING GAPS OR COMPARE ASPECTS OF IDEAS Two ideas were given and Chatgpt was asked to rank potential ideas.	IMPROVING EXISTING IDEAS Claude OPUS was used to provide potential variations on the suggestions provided by Gemini 3.1 Pro.
LITERATURE REVIEW Gemini 3.1 Pro	FINDING LITERATURE No AI used ADDING ADDITIONAL LITERATURE FOR EXISTING STATEMENTS AND FACTS No AI Used	FINDING EXAMPLES FROM KNOWN LITERATURE No AI used COMPARING LITERATURE Gemini 3.1 Pro was used to compare the quality of methodology and results for different paper.
METHODOLOGY Claude OPUS 5	PROPOSING NEW SOLUTIONS TO PROBLEMS AI was used to new loss functions. COMPARING RELATED SOLUTIONS AI was used to compare solutions like bi-encoder against cross-attention, transfer-pretraining data sources.	FINDING ITERATIVE OPTIMIZATIONS Not Used
EXPERIMENTS Claude OPUS	DESIGNING NEW EXPERIMENTS AI was asked to comment on the potential usefulness of experiments.	EDITING EXISTING EXPERIMENTS Not Used

	FINDING, COMPARING, AND AGGREGATING RESULTS AI was used to parse the training logs extract information and convert into comparison tables.	
WRITING Claude OPUS	GENERATING NEW TEXT BASED ON INSTRUCTIONS AI was to fill in text given a template or complete a sentence.	ASSISTING IN IMPROVING OWN CONTENT AI was used to improve the structure, flow and grammer of the content.
	PARAPHRASING RELATED WORK AI was asked to paraphrase sections of text to make them clearer.	PUTTING OTHER WORKS IN PERSPECTIVE Not Used
PRESENTATION Claude OPUS	GENERATING NEW ARTIFACTS AI was asked to generate plots from metrices.	IMPROVING THE AESTHETICS OF ARTIFACTS Not Used
	FINDING RELATIONS BETWEEN OWN OR RELATED ARTIFACTS Not Used	
CODING Claude OPUS	GENERATING NEW CODE BASED ON DESCRIPTIONS OR EXISTING CODE AI was used templates to write code for tasks like implementing ideas from papers, data transformation, visualization.	REFACTORING AND OPTIMIZING EXISTING CODE Not Used.
	COMPARING ASPECTS OF EXISTING CODE Not Used.	
DATA Claude OPUS	SUGGESTING NEW SOURCES FOR DATA COLLECTION AI was used to find SNLI and PAWS for transfer pretraining.	CLEANING, NORMALIZING, OR STANDARDIZING DATA AI uwas used to preprocess the SNLI and PAWS data like extracting triplets, regrouping pairs.
	FINDING RELATIONS BETWEEN DATA AND COLLECTION METHODS Not Used.	
ETHICS Claude Code, Claude OPUS, Gemini 3.1 Pro	WHAT ARE THE IMPLICATIONS OF USING AI FOR THIS PROJECT? I personally believe that using can make the development faster but with the risk of quality degradation.	WHAT STEPS ARE WE TAKING TO MITIGATE ERRORS OF AI FOR THIS PROJECT? Thoroughly review changes, asked questions to myself why is this change made by AI. Asked same questions to

different AIs and manually debugged where something felt off.

WHAT STEPS ARE WE TAKING TO MINIMIZE THE CHANCE OF HARM OR INAPPROPRIATE USE OF AI FOR THIS PROJECT?

None taken.

THE CORRESPONDING AUTHORS VERIFY AND AGREE WITH THE MODIFICATIONS OR GENERATIONS OF THEIR USED AI-GENERATED CONTENT

Verify that any generated or modified content was approved by the authors involved. This can include facts, statements, ideas, and others.
